

Aktion „Sprich mit mir“

Talk to me – baby instead of a mobile / Smartphone!

Even if your baby cannot speak yet, it is important that he/she is addressed verbally, hears familiar voices and is given eye contact – that gives security and is the foundation for a positive and healthy, emotional and mental development. **So, mobile phones should also be put to one side:**

Talk to your baby! This arouses his/her joy in speaking just like inspiring togetherness: accompany play with words, tell the baby what you are doing and what he/she is doing. Repeat his/her sounds and syllables, sing short rhymes and verses to him/her, repeat small melodies and nicknames.

Read something to your child! While the baby is spellbound by the stories, he/she learns new words and expressions "in passing" and incorporates them in his/her vocabulary. Your baby becomes acquainted with standard language and sentence patterns. In addition, the ability to concentrate and the imaginative powers as well as the memory are encouraged.

Playing is important

DIY (do it yourself) - soap bubbles

Mix

4 cups of water

½ a cup of sugar

½ a cup of washing-up liquid

→ in a bowl. Form a ring from a pipe cleaner or wire and off you go.
